

LogisticFlow::execute

```
graph LR; A[LogisticFlow::execute] --> B[FlowImpl::getTarget]; A --> C[System::getValue];
```

The diagram illustrates a sequence of method calls. A central node, 'LogisticFlow::execute', is shown in a grey box. Two blue arrows originate from its right side, pointing to two separate white boxes. The top arrow points to 'FlowImpl::getTarget', and the bottom arrow points to 'System::getValue'. All boxes have a thin black border.

FlowImpl::getTarget

System::getValue
